

**Dr. Paula Kluth** is a consultant, teacher, author, advocate, and independent scholar who works with teachers and families to provide inclusive opportunities for students with disabilities and to create more responsive and engaging schooling experiences for all learners. Paula is a former special educator who has served as a classroom teacher, consulting teacher, and inclusion facilitator. Her research and professional interests include differentiating instruction, and supporting students with autism and significant disabilities in inclusive classrooms.

## About this workshop:

In this interactive session, participants will learn practical ways of supporting students with autism spectrum labels & other disabilities within a general education classroom. Topics addressed include defining (and redefining) autism, listening to the voices of those with autism, differentiating instruction, creating more active and responsive lessons, making the classroom comfortable, and providing opportunities for communication and social skill development. The session will focus on the importance of pushing beyond access and participation and asking schools to challenge students and to understand each learner as complex and capable.
